Mental Status	The early versions of Windows were often thought of as simply graphical user interfaces, mostly because they ran on top of MS-DOS and used it for file system services.[4] However, even the earliest 16-bit Windows versions already assumed many typical operating system functions; notably, having their own executable file format and providing their own device drivers (timer, graphics, printer, mouse, keyboard and sound) for applications. Unlike MS-DOS, Windows allowed users to execute multiple graphical applications at the same time, through cooperative multitasking. Windows implemented an elaborate, segment-based, software virtual memory scheme, which allowed it to run applications larger than available memory: code segments and resources were swapped in and thrown away when memory became scarce, and data segments moved in memory when a given application had relinquished processor control. The early versions of Windows were often thought of as simply graphical user interfaces, mostly beca	Mental Status	⊕ Confused, Event Oriented, Hallucinations, Other, Person Oriented, Place Oriented, Time Oriented, Unresponsive □ Combative

Unlike MS-DOS, Windows allowed users to execute multiple graphical applications at the same time, through cooperative multitasking. Windows implemented an elaborate, segment-based, software virtual memory scheme, which allowed it to run applications larger than available memory: code segments and resources were swapped in and thrown away when memory became scarce, and data segments moved in memory when a given application had relinquished processor control. The early versions of Windows were often thought of as simply graphical user		♠ Abnormal Gait

Narrative

The Gutenberg Bible (also known as the 42-line Bible, the Mazarin Bible or the B42) was the first major book printed with movable type in the West and the first major book produced on a printing press anywhere in the world. It marked the start of the "Gutenberg Revolution" and the age of the printed book in the West.

Patient 1 of 2

Widely praised for its high aesthetic and artistic qualities,[1] the book has an iconic status. It is an edition of the Vulgate, printed by Johannes Gutenberg, in Mainz, Germany, in the 1450s. Forty-eight copies, or substantial portions of copies, survive, and they are considered by many sources to be the most valuable books in the world, even though a complete copy has not been sold since 1978.[2][3] The 36-line Bible is also sometimes referred to as a Gutenberg Bible, but is likely the work of another printer. The Gutenberg Bible (also known as the 42-line Bible, the Mazarin Bible or the B42) was the first major book printed with movable type in the West and the first major book produced on a printing press anywhere in the world. It marked the start of the "Gutenberg Revolution" and the age of the printed book in the West. Widely praised for its high aesthetic and artistic qualities,[1] the book has an iconic status. It is an edition of the Vulgate, printed by Johannes Gutenberg, in Mainz, Germany, in the 1450s. Forty-eight copies, or substantial portions of copies, survive, and they are considered by many sources to be the most valuable books in the world, even though a complete copy has not been sold since 1978 [2][3] The 36-line Bible is

	Specialty Patient - Advanced Airway							
Airway	Indications	Monitoring Devices	Rescue Devices	Reasons Failed Intubation				
Class1	Airway Reflexes Compromised	Airflow Monitor	BVM	Blood, vomitus, or secretions in airway				
Grade2	Apnea/Agonal Respirations	CPR	Needle Jet Ventilation	Equipment failure				
	Potential for Future Airway	SpO2		Patient anatomy				
	O
